About BPA

The Bonneville Power Administration has been powering people and careers for nearly 75 years. We are a non-profit federal agency that provides clean, emissions-free electricity to the Pacific Northwest and maintains a high voltage transmission system to deliver that electricity. We are a leader in sustainability and environmental stewardship, promoting energy efficiency, renewable energy, the smart grid, fish and wildlife protection and initiatives to address climate change. We are a visionary and innovative agency that values diversity and creativity and encourages continuous learning. We are located throughout the Pacific Northwest with opportunities in cities, smaller communities and rural areas. You can learn more about BPA at www.bpa.gov.

Job Summary & Major Duties

The incumbent serves as a Business Analyst in Power Services and reports directly to Manager of Power Policy Development.

Duties include:

- Works with managers to document and recommend improvements to business processes within the Power Services organization. Serves as a resource in the area of documenting data and process flows and corresponding management controls. Assists managers and staff in ensuring systems and processes are highly efficient and effective at achieving results that are documented and repeatable.
- Provides expertise and serves as a resource for Power Services managers in building process models using industry-standard modeling languages and tools (such as Metastorm's ProVision).
- Provides guidance to and oversees teams in their conduct of needs assessments, project process mapping, benchmarking and implementation of process improvements.
- Develops and supports structured management of business documents and artifacts which include training documentation, desk procedures, system requirements, process designs, etc.
- Leads the design of structured change management approaches.

- As appropriate, plans and leads process improvement projects, studies, and analyses and, organizes, and/or directs, team efforts to develop, present to management and implement recommendations.
- Partners and collaborates with other specialists and teams to perform lessons learned, after action reports and root cause analysis as part of identifying opportunities to apply business or process improvement strategies.

Power Policy Development oversees and facilitates the comprehensive development of power policy. This function also coordinates policy development and concurrence across the agency and ensures that policy formats and quality control are consistently applied throughout the organization. This group may lead teams conducting policy development. In addition, this group provides support to Power Services managers and Agency Compliance and Governance by being a point of contact to address process management improvement efforts in Power Services, meeting BPA's OMB Circular A-123 compliance activities and providing business analyst support, including process mapping, documentation and training.

Power Services is in the process of reorganizing. This position will fall under the new PB (Power Services Business Operations) organization, which is anticipated to be effective in September, 2012. The position will report directly to the Power Services Business Operations Manager.
